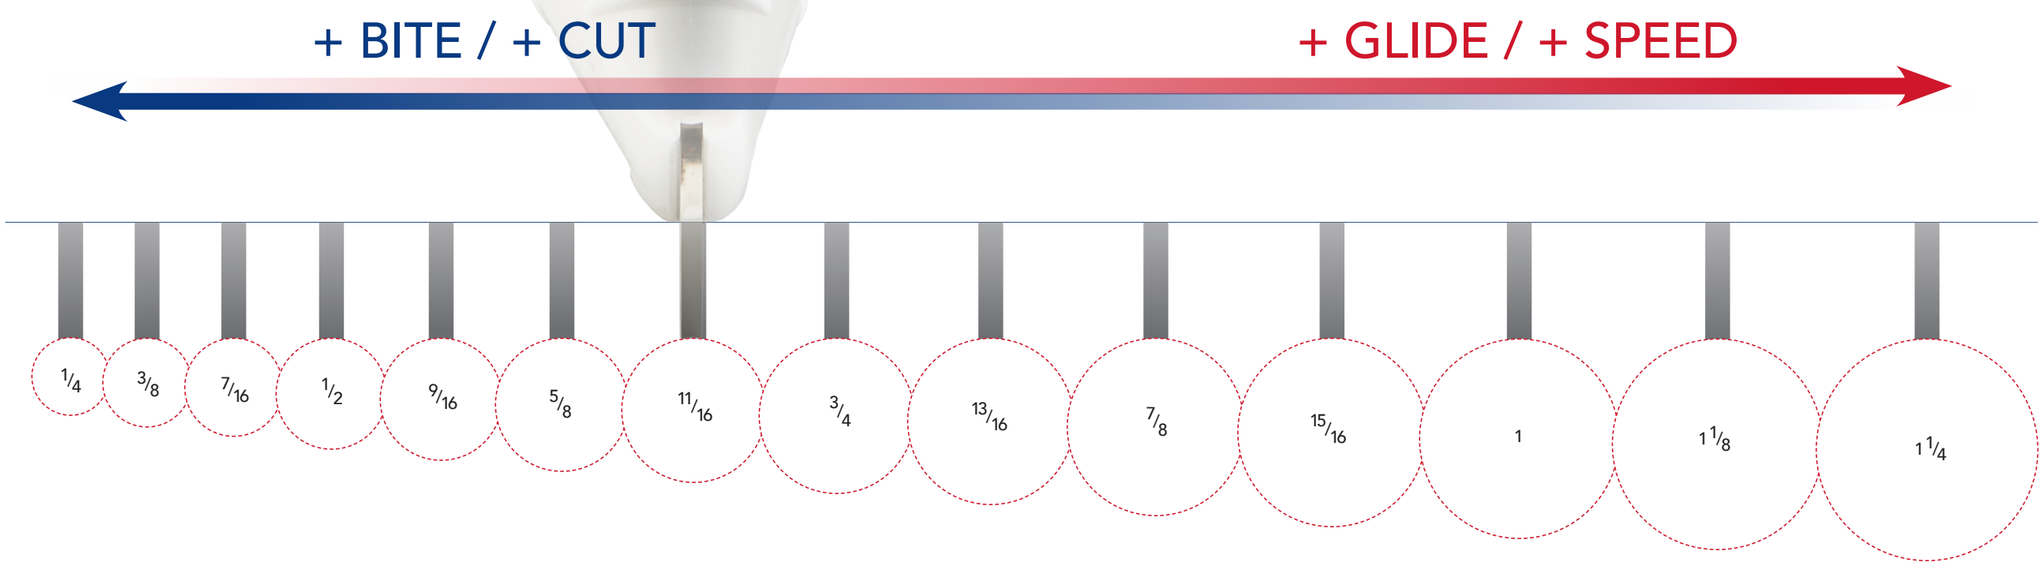
# Find Your Optimal Hollow

ELITE BLADE PERFORMANCE TECHNOLOGY

*There is no standard sharpening that works best for everyone. Many factors influence what hollow will feel right for you – your blade profile, your size, your weight, your playing style.*


- With an ELITE sharpening, you may not need as deep a cut asusual. Your blades will have just as much bite, but they will also give you more glide and less fatigue.
- A deeper hollow means more bite but also more effort. There are advantages in speed, and efficiency in using the widest hollow that feels comfortable.
- With many options to choose from – from ¼" to 1¼" – we can help you find which sharpening feels right for you.
